

PS900

At barely over 11" long and only 1.5 pounds in weight, the **PS900** is the ultimate travelling companion. The **PS900** is a fully self contained and most convenient printer complete with paper and battery making it the smallest in the market.

Print from your laptop, print what you need, when you need it, with the convenience that you have always wanted. Don't be confined to just print text, as graphics can be printed clearly without smudging. How many times have you been away from your home or office and found that you needed a document right away? Maybe it's your travel documents or changed flight information. Avoid airport line-ups by printing your boarding pass as opposed to standing in line. You can even print web pages when browsing the internet for such items as bank transactions, show tickets and brochures. Many times it is that important email from a customer or manager. Often we leave the home or office and forget to bring vital documents, simply have them emailed to your portable device and print them on-the-spot with your **PS900**. Reading the small print on email devices such as your Blackberry can often be difficult, simply print them on your **PS900** to make them legible. The possibilities are endless!

Features:

- Prints characters and graphics clearly (no smudging) – and no leaking ink
